

TECHNICAL DATA SHEET

PETG

1. DESCRIPTION

Polyethylene terephthalate glycol (PETG) is one of the world's best-known thermoplastic polymers. Extruder PETG has been developed for a wide range of applications where the main requirement is a good balance between mechanical and optical material properties. The low-shrinking technology ensures that the material can be processed in an energy-saving manner at low temperatures and thus with relatively little distortion. The raw material is certified according to FDA, REACH and RoHS standards.

2. FEATURES

- Good mechanical properties
- High chemical resistance
- Low warping
- Low shrinking
- Recyclable
- Low-shrinking technology
